SUMMARY

Results-driven Full-Stack Developer and AI Engineer with a B.E. in Computer Science & IT (2025). Specialized in building scalable, production-grade web applications with seamless AI integration and polished UI/UX. Independently architected and shipped two full-stack platforms — RASU (AI-powered e-commerce) and ARIS (Accident Response Intelligence System) — demonstrating end-to-end ownership from database design and REST APIs to responsive React frontends. Certified in Python, Deep Learning, and Machine Learning. Passionate about solving real-world problems through clean, performant, and intelligent software.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL
Frontend: React.js, Tailwind CSS, Vite, Responsive Design, Component Architecture
Backend: Node.js, Express.js, REST APIs, JWT Authentication, WebSockets
AI & ML: Deep Learning, Machine Learning, AI Image Generation, Prompt Engineering, LLM APIs, OpenCV
Databases: PostgreSQL, MongoDB, MySQL, Supabase
Tools & Deployment: Git, GitHub, Postman, VS Code, Vercel, Render, npm, Linux/Bash
Concepts: Full-Stack Architecture, MVC Pattern, API Security, UI/UX Design, Agile Workflow

PROJECTS

- RASU – AI-Powered E-Commerce Platform** | rasu.rkdev.online | [GitHub](https://github.com) 2024 – Present
 - Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Python, REST APIs, AI Image Generation, 3D Product Models
 - Architected a production-grade full-stack e-commerce platform with 20+ product categories, AI-generated product imagery, and interactive 3D model previews.
 - Engineered a secure JWT-based authentication system with email and phone number verification ensuring robust end-to-end user data protection.
 - Built a multi-parameter search and filtering engine supporting category, price range, gender, and fashion-type queries improving product discoverability.
 - Designed a fully responsive React.js UI covering product browsing, cart management, checkout flow, real-time order tracking, and customer support integration.
- ARIS – Accident Response Intelligence System** | aris.rkdev.online | [GitHub](https://github.com) 2024 – Present
 - Tech Stack: React.js, Node.js, PostgreSQL, WebSocket, JWT, Supabase, Vercel, Render
 - Built a production-grade AI-powered accident detection platform with real-time surveillance feeds, emergency dispatch system, and WebSocket live alerts.
 - Developed an analytics dashboard with live monitoring across 6 camera feeds and real-time incident reporting using WebSockets.
 - Integrated PostgreSQL on Supabase for scalable data storage and deployed full-stack application on Vercel and Render.
 - Implemented JWT-based authentication and role-based access control ensuring secure system access for emergency responders.

CERTIFICATIONS

Python	Kaggle 2026
Intro to Deep Learning	Kaggle 2026
Intermediate Machine Learning	Kaggle 2026
JavaScript Algorithms & Data Structures	freeCodeCamp 2026

EDUCATION

Siksha ‘O’ Anusandhan (SOA), ITER	Bhubaneswar, India
<i>Bachelor of Engineering – Computer Science & Information Technology</i>	2021 – 2025
Jharkhand Academic Council	Jharkhand, India
<i>Intermediate (Class XII)</i>	2021
Central Board of Secondary Education (CBSE)	India
<i>Matriculation (Class X)</i>	2019
