SUMMARY

Computer Science Engineering graduate with strong experience in **Full-Stack Web Development, and UI/UX design**. Skilled in building scalable full-stack applications using React.js, Node.js, Python, REST APIs, and modern database systems. Developed a complete **AI-powered e-commerce platform (RASU)** with advanced filtering, authentication, and interactive UI. Passionate about solving real-world problems through software development and continuously improving skills in modern web technologies and AI-based applications.

EDUCATION

Bachelor of Engineering, Computer Science and Information Technology

Siksha 'O' Anusandhan (SOA), Institute of Technical Education and Research (ITER). (2021-2025)

Intermediate, Jharkhand Academic Council

(2021)

Matriculation, Central Board of Secondary Education (CBSE)

(2019)

PROJECTS

RASU – AI-Powered Full Stack E-Commerce Platform

Technologies: React.js, Node.js, Express.js, PostgreSQL, Python, REST APIs, AI Image Generation, 3D Product Models.

- Designed and developed a full-stack e-commerce platform with 20+ product categories, advanced filtering, AI-generated images, and interactive 3D product models.
- Implemented secure authentication and authorization using JWT-based login and signup system with email and phone number verification.
- Developed advanced product filtering and search features allowing users to browse items based on categories, price range, gender, and fashion type.
- Integrated AI-generated product images and interactive 3D product models to improve product visualization and enhance customer engagement.
- Designed an interactive and responsive UI/UX using React.js, ensuring seamless navigation across product pages, cart, checkout, and order tracking.
- Added customer support integration (chat/phone support) and strict form validation to ensure reliable user interactions and data security.

FoodGo – Food Ordering App UI Prototype

Technologies: Figma, UI/UX Design

- Designed a complete food ordering mobile application interface using Figma.
- Created detailed user flows including product browsing, cart management, checkout, and payment confirmation.
- Designed intuitive screens with clear call-to-action buttons, dynamic pricing updates, and responsive layouts.
- Focused on modern UI/UX principles to improve usability and customer engagement.

AI Desktop Virtual Assistant

Technologies: Python, Tkinter, Speech Recognition, Pyttsx3

- Developed a voice-controlled AI desktop assistant with an interactive graphical user interface using Tkinter.
- Integrated speech recognition and text-to-speech libraries to enable voice-based interaction with the system.
- Implemented automation features including playing music, sending WhatsApp messages, performing web searches, and opening desktop applications.
- Demonstrated strong skills in GUI development, automation scripting, and multi-library integration.

Face Detection

Technologies: Python, OpenCV, Haar Cascade Classifier

- Built a real-time face detection application using OpenCV with webcam integration.
- Implemented Haar Cascade Classifier to detect faces from grayscale video frames.
- Developed a real-time interface that highlights detected faces with bounding boxes.
- Applied practical concepts of computer vision, image processing, and real-time video analysis.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML5, CSS3.

Tools & Technologies: Git, GitHub, Docker, Figma, REST APIs, JWT Authentication

Databases: PostgreSQL, MongoDB, SQL.

Framework & Libraries: React.js, Node.js, Express.js, Tkinter, OpenCV.

Concepts: Full-Stack Development, UI/UX Design, API Development, Authentication Systems, Database Optimization, Agile Development.
